ZONE 1

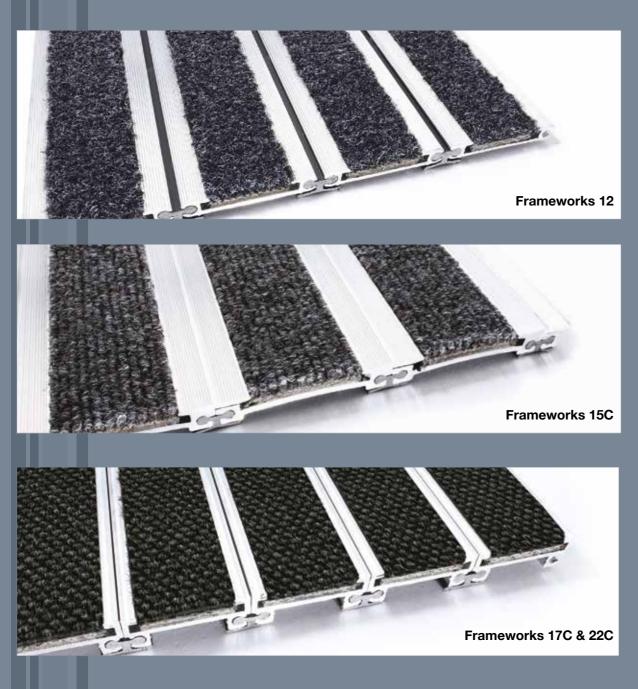

In Zones 1a and 1b the installation of exterior matting catches the first wave of heavy debris in a high traffic area, ensuring the removal of up to 40% of dirt and moisture from entering the building. An effective primary entrance mat will continue the removal of dirt and moisture working with the external matting containing any heavy debris.

ZONE 2

In these zones a high specification secondary barrier mat will continue the cleaning and scraping process, removing up to 70% of remaining dirt and moisture. At this stage dust is also driven into the matting rather than remaining airbourne.

ZONE 3

n buildings with a very high volume of traffic, primary matting is often supplemented into secondary areas, cose lay matting and logo mats are used to reduce dust migration throughout main corridors and completely remove remaining dirt and moisture from shoes completing the drying process and protecting your building investment.

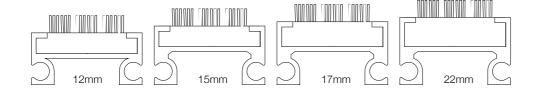

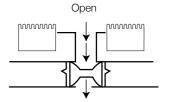

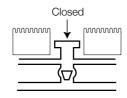

How to choose your frameworks system*:

Stage 1: Select your height

Stage 2: Pick your construction

Open - collect dirt and moisture inside the mat/matwell rather than on the surface. Rollable for cleaning. Closed - Dirt and moisture collected on the surface of the mat.

Stage 3: Pick your insert from 13 options

Mat. Works provides a survey and installation service on all Frameworks projects.

FRAMEWORKS 12

Description:

Low profile rollable aluminium grid matting system suitable for heavy traffic areas.

deal for recess matwells or areas where surface mounting s required.

The extruded aluminium profiles are assembled using PVC hinges which incorporates an integral damper strip. PVC hinges enable easier on site shaping.

Custom made to required sizes.

Ramping available for surface mounting.

Insert options available to allow for external use.

Anadised version available in black and bronze.

Colours:

16 colour options available: see page 9.

Accessories:

Frameworks accessories – see page 56 for further details. For simple rectangular mats, Frameworks can be made to exact requirements. For more complicated shapes, Mat.Works recommends one of our approved installers.

FRAMEWORKS 15C

Description:

Heavy gauge 15C entrance matting system.

Frameworks 15C incorporates an arch form heavy gauge aluminium chassis, capable of withstanding extreme traffic in the most demanding applications.

42mm wide wiper inserts provides optimum contact area for absorbency and soil collection.

Wide variety of wiper strips to suit almost any application with 16 different colourways.

Assembled using PVC hinges which incorporate an integral damper strip. PVC hinges enable easier on site shaping.

Custom made to required sizes.

Anadised version available in black and bronze.

Colours:

16 colour options available: see page 9.

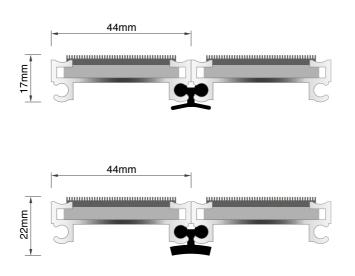

Accessories:

Frameworks accessories – see page 56 for further details. For simple rectangular mats, Frameworks can be made to exact requirements. For more complicated shapes, Mat.Works recommends one of our approved installers.

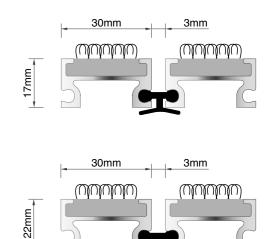

Mat. Works provides a survey and installation service on all Frameworks projects.

FRAMEWORKS 17C & 22C

Description:

Heavy duty primary entrance mat with exceptional performance.

Frameworks 17C and 22C closed construction ensures that all debris is captured by the mat surface to ensure a convenient cleaning operation.

Suitable for both footfall and trolley traffic.

Wide variety of wiper strips to suit almost any application with 16 different colourways.

The extruded aluminium profiles are assembled using PVC hinges which incorporates an integral damper strip. PVC hinges enable easier on site shaping.

Anadised version available in black and bronze.

Colours:

16 colour options available: see page 9.

Accessories:

Frameworks accessories – see page 56 for further details. For simple rectangular mats, Frameworks can be made to exact requirements. For more complicated shapes, Mat.Works recommends one of our approved installers.

FRAMEWORKS 170P & 220P

Description:

Frameworks 17OP and 22OP are heavy traffic entrance matting systems. Both systems incorporate a rollable, grid style, open surface construction. The open surface grid system allows dirt to fall into specially designed debris channels whilst allowing the textile inserts to wipe moisture from feet.

Wide variety of wiper strips to suit almost any application with 16 different colourways.

The extruded aluminium profiles are assembled using PVC hinges which incorporates an integral damper strip. PVC hinges enable easier on site shaping.

Custom made to required sizes.

A drainable 17DR is also available.

Anadised version available in black and bronze.

Colours:

16 colour options available: see page 9

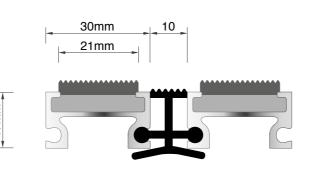

Accessories:

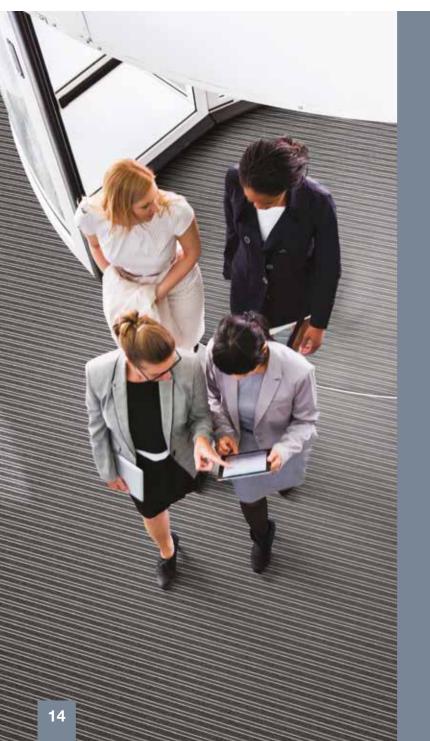

Frameworks accessories – see page 56 for further details. For simple rectangular mats, Frameworks can be made to exact requirements. For more complicated shapes, Mat.Works recommends one of our approved installers.

FRAMEWORKS 17CS

Description:

Frameworks 17CS aluminium based entrance at is ideal for heavy traffic areas.

Frameworks 17CS is a closed construction primary entrance mat combining textile wiper inserts with alternate PVC scraper bars allowing for dirt and moisture to be taken off in one movement.

Wide variety of wiper strips to suit almost any application with 16 different colourways.

Custom made to required sizes.

Anadised version available in black and bronze.

Colours:

16 colour options available: see page 9

Accessories:

Mat.Works provides a survey and installation service on all Treadlock 25 projects.

TREADLOC 25

Description:

Treadloc 25 by Mat.Works is a revolutionary modular matting solution. Manufactured from nitrile rubber, the 25cm x 25cm tile may be small but packs an almighty punch when it comes to performance.

Specifically designed to withstand heavy footfall, Treadloc 25 will not expand, contract, fade or become brittle, nor will it bend or buckle under pressure making it an ideal heavy contract solution for entrance areas in every sector. Unlike aluminium solutions, Treadloc 25 can withstand slight undulations in the sub-floor, which are sometimes unavoidable, without compromising the strength and performance of the product.

Treadloc 25 tiles are easily interchangeable and designed with interlocking male and female components for ease of installation. The versatile tiles can be quarter-turned during installation to create a checkerboard effect allowing for multi-directional entrances. There is also the added benefit of being able to purchase individual Treadloc 25 tiles, meaning any damaged tiles can be replaced with ease.

Technical data:

e size mm

250 mm x 250 mm x 12

Easy Inter-locking system a standard. Removable male and female connectors.

mposition

Nitrile rubber composition formance

Nitrile rubber is resistant to oil, grease & fuel.

Twice the weight of leading competitor products - twice the

Treadloc 25 provides a flammability rating of Cfl-s2 (BS EN 14041:2004)

Perfect for Healthcare

The nitrile rubber in Treadloc 25 is now manufactured with copper compounds, a material that has been proven to have anti-microbial properties, combating the spread of hospital-acquired infections, including MRSA.

The product has been tested to ISO 22196, which specifies a method of evaluating the antibacterial activity of antibacterial-treated plastics, and other non-porous surfaces of products.

The results showed that the copper in the Treadloc 25 killed 99.29% of MRSA Bacterium.

When examined under the Coefficient of Friction test (TRRL Pendulum test in accordance with BS 7976-2:200+A1:2013), Treadloc 25 has been proven to provide a low risk for slips in both dry and wet conditions.

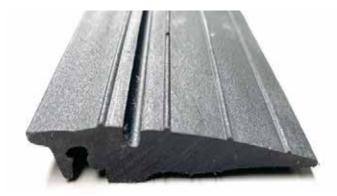

No matwell or recess? No problem! Treadloc 25 has an optional click-fit ramping system...

Dimensions: W 125mm x H 125mm

Dimensions: W 66mm x L 2000mm x H 10mm

TREADLOC 25 RAMPING SOLUTION

Description:

Treadloc 25 can be surface-mounted, with the option of a heavy duty click-fit ramping system, making the product suitable for buildings without a matwell or recess.

The heavy-duty ramped edges allow wheeled and trolley access, as well as helping to prevent trip accidents. The system allows our popular used to create a 'surface matwell' where a mat is laid directly on top of the floor.

Key Features:

Ramping system to enable Treadloc 25 to be surface-mounted

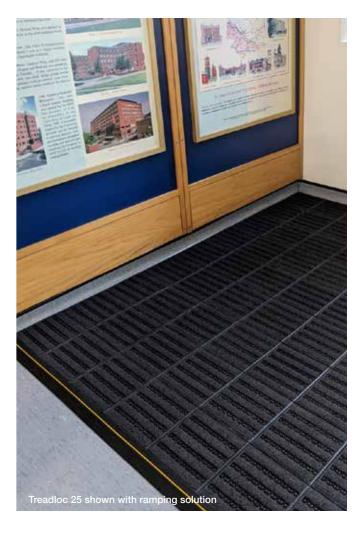

Made from durable rubbe

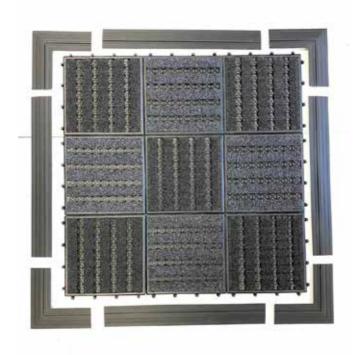

Pre-mitred corners for accurac

Available in 2m lengths

Incorporate a colour of your choice into the ramp debris channel, for a striking and stand-out finish (as shown in the image on the left).

TREADSURE 205

Description:

designed not just for extremely heavy footfall but also with wheeled traffic entrances in supermarkets, retail, education, and healthcare in mind - providing an alternative to aluminium matting systems. Manufactured from nitrile rubber to provide optimum performance and has a host of key features that set the product apart from any other standard modular matting system.

One of these is its sheer durability, which is provided by the product size and weight, ensuring it is one of the heaviest modular matting solutions available on the market. This sturdiness of Treadsure 205 provides significant durability when installed. It will

not move or slip in the matwell. It also makes installation easier, as there are no click or interlocking systems. If more than one system is needed, the modules are simply be placed next to each other - significantly reducing any potential installation times.

Weight cannot be rivalled in the current market.

Will not buckle or bounce under pressure, making it suitable for wheel and trolley traffic.

Perfect for healthcare environments due to its copper compounds combating the spread of hospital-acquired infections, including

Tyre Tile

Primary Entrance Matting -Manufactured using 100% recycled rubber

TYRE TILE

Description:

Mat.Works has developed a value engineered product that is also a fully recycled matting system.

to the environment. Tyres that are illegally dumped in the countryside or in land fills are virtually impossible to break down due to the synthetic and chemical materials inside them, and when burnt these cause dense smoke and toxic fumes, many of which cause a damaging carbon footprint. We have introduced Tyre Tile as a product which has very little impact on the environment and as it uses 100% recycled or recyclable source material is value engineered to ensure it can fit into any project.

This gives us, the manufacturer, and you the consumer, the opportunity to reduce our carbon footprint by not using raw materials from source.

Function:

Tyre Tile soil resistant mats are specifically recommended for covered areas, preferably recessed into the floor. These mats are designed for heavy duty wear in situations such as shopping centres, hospitals and public buildings.

The Tyre Tile mat is non-slip and extremely stable therefore this type of mat is absolutely safe for wheelchairs, high heels and walking sticks.

Made from 100% recycled tyres

MW PRINT MAT

Description:

This truly high quality multi-functional dust control mat not only cleans and dries shoe-soles preventing dirt and moisture being tracked into facilities. It also provides an excellent opportunity to address safety issues as most people primarily look to the floor.

Superior colour fastness is ensured, in accordance with DIN54006. We work with a large selection of PMS colours, which allows any other colour to be matched. Printed Mats offers a state-of-the-art technology that even allows 3-dimensional effects, fine lines and colour shading, so each mat has a truly individual customised image.

Technical data:

Tufted cut loop carpet mat consisting of 100% non-crush polyamide 6.6 high twist yarn, approx 700 ${\rm gr/m^2}$.

Nitrile rubber backing, 1.5 mm thick.

Non slip-gripper backing.

Enforced borders, do not curl in cold weather and will not tear.

Machine washable at 50°C.

Oil and microba registant

Excellent moisture absorption capacity: >4 ltr/m².

Pile height 7mm

Overall thickness: 8.5 mm.

How to order

- 1 Title or name: Give any name relevant to the design.
- 2 Send logo or image to sales@mat-works.co.uk:
 Acceptable formats are JPG, TIF, EPS, PCX,
 Adobe Illustrator, Certified PDF. In case no logo
 is available, text is also possible. In such case,
 give text, preferred letter type and letter colour.
- 3 Sizes: Select required mat size. 60cm, 75 cm, 85 cm, 115 cm, 150 cm and 200 cm including border lengths up to 400 cm. Sizes are approximate, subject to a tolerance of about 3%.
- 4 Orientation: Landscape or portrait.

- 5 Background colour: Recommended are dark colours.
- 6 Quantity: Indicate number of mats. More mats per design lowers the cost.

COIR LOGO

Description:

Coir is traditional and effective barrier matting, made with 100% natural fibres. Perfectly suitable for both commercial and domestic entrance areas. Coir matting will capture a large amount of moisture and provides excellent airflow for efficient vacuuming.

Mat. Works has a range of framing options to suit every matting requirement.

Frames range from 10 mm to 25 mm on all Frameworks products.

cleaning guide

Rollable primary matting systems

Daily - Vacuum clean

Weekly - Removal of grit, etc. and vacuum clean. Removal of chewing gum

Monthly - Removal of large grit, etc. and vacuum clean. Cleaning of matwell: - roll up mat and extract dirt / grid from under the mat. Check retainer screws at all 4 corners of mat and replace mat after cleaning making sure retainer screws are secure.

Periodically - Removal of large grit, etc.+ vacuum clean. Cleaning of matwell by roll up the mat and extract dirt grid from under the mat. Check retainer screws and replace mat after cleaning making sure retainer screws are secure. Accumulating dirt underneath the mats may undermine the structure of the mat.

Cleaning frequency is subject to amount of traffic, surroundings and weather conditions

Modular primary matting systems

Daily - Vacuum clean

Weekly - Removal of grit, etc. vacuum clean. Removal of chewing gum*

Monthly - Remove large grit from the mat well by vacuum cleaning. Thoroughly clean mat well: - Take modules up and extract dirt / grit from under the mat. Replace modules in exact order they came out.

Periodically - Removal of large grit, etc. + vacuum clean.

Cleaning of matwell: - Take up modules extract dirt / grit from under the mat. Check sub floor is sound and replace modules in exact place where they were found. We also recommend that a periodic deep clear using hot water extraction is used to remove deep set dirt within the mat. (Specialist cleaning firms can be recommended).

Cleaning frequency is subject to amount of traffic, surroundings and weather conditions.

*NB:- removal of chewing gum is best using a proprietory gum removal gel such as that from fleetlight tel:- 02084667848.

Maintenance Specification for Mat.Works Entrance Carpets and Carpet Tiles - To maximise the entrance carpet's aesthetic appeal, performance and life expectancy, it is imperative to ensure at the specification stage that:

- Carpets will be protected from other site activities during installation and thereafter.
- Clients understand the enclosed information and that they
 accept responsibility for correct carpet care. (Mat.Works will
 provide a copy of the Cleaning and Maintenance guide to the
 end-users address when requested.)

General Cleaning - Daily vacuuming with a rotary brush vacuum cleaner, preferably with an adjustable head, is recommended. It is essential to remove all loose soil daily because if left to build up, the particles of dirt are much harder to remove and are more damaging to the yarn structure, thereby decreasing the life of the carpet.

Entrance Areas are prone to higher traffic levels and higher levels of dirt and moisture. This means that the maintenance program for entrance matting should be more frequent than for general carpeting areas, a ratio of 2 entrance cleans to 1 carpet clean is a general good guide for preventative periodical maintenance.

Depending on the level of trafficking, the carpet should be periodically deep cleaned using high performance hot water extraction equipment. In certain circumstances, for instance excessively stained carpet the cleaning professional may consider a combination between rotary brush and extraction equipment to give improved results. Rotary brush cleaning by itself is not recommended.

A reputable contract cleaner should be used, preferably NCCA registered (for NCCA details telephone 0116 271 9550). It is important that the carpet is deep cleaned at least once a year.

Stain Removal - It is essential to deal with spillages immediately and any subsequent stains as appropriate. In the event of a spillage, immediately blot with a clean absorbent cloth until there is no further transfer from the carpet to the cloth. If any further stain remains or has otherwise been allowed to dry, the method will vary accordingly.

It is recognised that particularly for contract situations, if stains are not dealt with immediately, cleaning staff may not be in a position to identify the type of stain. A good quality, multi-purpose stain remover is therefore very useful, although it must be understood that this will not successfully tackle all types of stains, and wherever possible the chart recommendations should be strictly adhered to (see right). Also any stains left over a period of time become increasingly more difficult to remove and may require several treatments.

In all cases after stain removal the carpet should be allowed to dry completely and then cleaned with a rotary brush vacuum cleaner.

Solvent cleaning of bitumen backed tiles should preferably be avoided. Where this is not possible, extra caution should be taken and only very light surface cleaning should take place

Special Cases

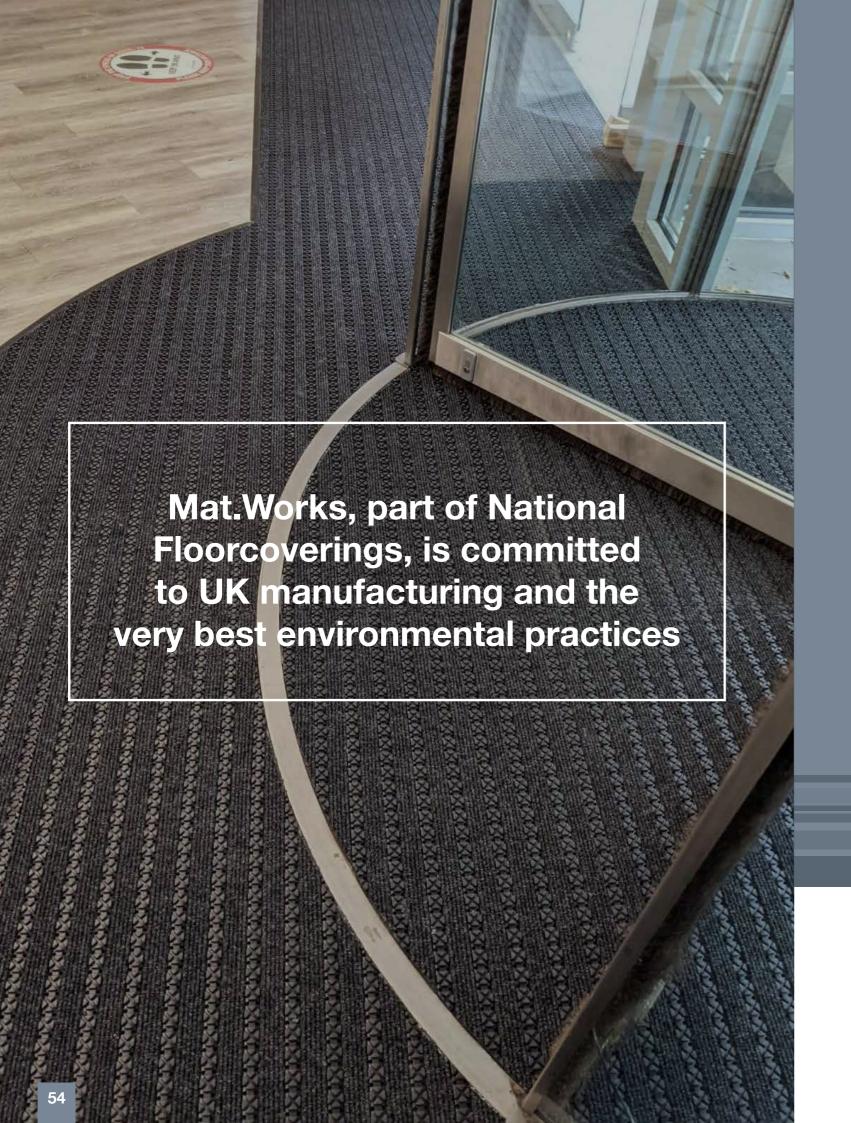

Cigarette burns – it is recommended that these are punched out and replaced by a professional carnet fitter

Major spillages - seek professional advice from a member of the NCCA.

If any of the treatment lists are not successful, seek professional help. The methods are based upon experience and are recommended in good faith. However, we cannot accept responsibility for their use in any specific case.

cleaning & maintenance cleaning solutions & methods

Cleaning method A	Type of stain
A liquid detergent such as Granwax spot/stain remover, in accordance with manufacturers instructions. Granwax tel no: 01773 541177	Alcoholic beverages Baby or animal stains Blood (wet) Coffee, tea chocolate Minerals and fruit juices Water based paint Food Fountain pen ink Vomit Oil based paint or varnish Butter and other greases Cooking oils and other oils Ointment Metal polish Tar Cream, ice-cream and milk
Cleaning method B	Type of stain
A dry solvent spotter such as Prochem solvall.	All inks except fountain pen ink
Cleaning method C	Type of stain
Methylated spirits. Method: Moisten a cloth with the	
appropriate solvent an dab onto the stain. Carry on using alternate moist and dry cloths until no further stain transfer. Finally, cover the damp area with a thick wad of dry cloths, cover with something heavy and leave for several hours.	Coffee, tea, chocolate

National Floorcoverings

Our Heritage - Our Future

Producing a wide variety of products from entrance matting, fibre bonded carpets for the education market, tufted carpet and tiles for the commercial sector to specialised indoor and outdoor sports surfaces, the group has expertise in all flooring fields.

The family is dedicated to maintaining and developing its UK manufacturing base with customer support. It takes a colossal supply network to ensure a combined 500,000 sq.ft. of facilities run efficiently. In support of the local community, suppliers are often used in the surrounding vicinity of the factories.

By striving to be No.1 in sustainable design for flooring solutions the family of companies has established strong international export presence in more than 50 countries.

Where tested, the group has BRE 'A+' Ratings for its products, being the highest environmental standard currently available.

Across the UK, the group employs **over 350** people, most of which are local to the five manufacturing facilities in Yorkshire and Derbyshire.

With clients such as Google, Apple, Local Authorities, the Health Service, the Ministry of Defence, there is always a requirement to provide the highest quality products using the most technologically advanced production processes and therefore commanding a route to the future.

National Floorcoverings UK have a strong international export presence in more than **50 countries.**

National Floorcoverings is a **UK** family owned business which, along with associated family businesses, has a turnover exceeding £60m.
